

AI Intelligence Becomes a Commodity: The Task Price No Longer Decides

MANAGEMENT SUMMARY & CORE TAKEAWAY

MiMo V2.6 Pro ranks first among open models in the Artificial Analysis Intelligence Index, at \$0.13 per benchmark task. The question shifts from 'which model is smartest' to 'how much intelligence per dollar'. For Swiss SMEs, intelligence becomes a commodity: speed, integration, and governance decide.

CONTEXT & EXECUTIVE RELEVANCE

The price decline in AI models is well documented: open models put pressure on closed providers, and the trend points to further commoditization. The new consequence is that when a unit of intelligence costs cents, it becomes infrastructure—like electricity. That is exactly what MiMo V2.6 Pro illustrates.

The open model scores 46 on the Artificial Analysis Intelligence Index, ranking first among open and Chinese-developed models. But the decisive number is not the rank—it's the price: \$0.13 per benchmark task. The old question 'Which model is smartest?' is being replaced by 'How much intelligence do I get per dollar?'

CORE ACTION ITEMS

- 01 Speed of implementation and time-to-value
- 02 Clean integration with existing processes and data
- 03 Governance and data protection compliance (e.g., Swiss Data Protection Act)

SWISS COMPLIANCE & ARCHITECTURE GUIDELINES

- ☑ Full compliance with revised Swiss Data Protection Act (revDSG).
- ☑ Zero vendor lock-in on closed proprietary models.
- ☑ Seamless integration into Abacus, Bexio and M365 ecosystems.
