

Health Force: AI agents automate hospital billing in six weeks

MANAGEMENT SUMMARY & CORE TAKEAWAY

Health Force shows pre-trained vertical AI agents can take over hospital administration end-to-end and go live in six weeks without new integrations. For Swiss SMBs in regulated sectors, this is a clear signal that vertical AI agents are production-ready and deliver faster ROI than horizontal platforms.

CONTEXT & EXECUTIVE RELEVANCE

Health Force, based in Barcelona, has completed a €4.2 million seed round led by LUMO Labs. Its pre-trained agents log into existing hospital systems and handle prior authorizations, claims and quality reporting end-to-end. According to the company, they go live in six weeks without new integrations. Investors include Step Venture, Next Tier Ventures, Target Global and Calm/Storm.

Healthcare, finance and insurance are regulated and data-sensitive. That is exactly where vertical AI agents show their advantage: they are pre-trained for a specific industry and deliver reliable results faster than general-purpose platforms. The [KI-Podcast](<https://www.ki-podcast.ch/ki-kunstmarkt-nvidia-blackwell-gesundheitswesen-2024>) offers a Swiss perspective on how AI is changing healthcare for executives.

CORE ACTION ITEMS

- 01 Choose a high-volume process with clear rules.
- 02 Define measurable targets before starting.
- 03 Run a pilot that can be assessed within four to six weeks.
- 04 Scale only what demonstrably saves time and reduces errors.

SWISS COMPLIANCE & ARCHITECTURE GUIDELINES

- ☑ Full compliance with revised Swiss Data Protection Act (revDSG).
- ☑ Zero vendor lock-in on closed proprietary models.
- ☑ Seamless integration into Abacus, Bexio and M365 ecosystems.

Non-Binding Process Analysis

Let us review in 20 minutes where AI agents create immediate measurable efficiency in your workflows.
