

Salvaging a Business Transformation Project Gone Wrong

MANAGEMENT SUMMARY & CORE TAKEAWAY

A business transformation project can be like setting sail on an exciting adventure, filled with the promise of new opportunities and improved ways of working. At the start, there's a vision of steering the company into a brighter future, where processes are streamlined, and prod

CONTEXT & EXECUTIVE RELEVANCE

A business transformation project can be like setting sail on an exciting adventure, filled with the promise of new opportunities and improved ways of working. At the start, there's a vision of steering the company into a brighter future, where processes are streamlined, and productivity soars. However, the path to transformation is not always smooth. Despite the enthusiasm and careful planning, projects can sometimes veer off course, leading to frustration and setbacks. This feeling of being stuck in turbulent waters is not uncommon, as the road to transformation is often paved with unexpected challenges and obstacles.

When a transformation project begins to falter, it can feel overwhelming. Key issues such as misalignment of goals, inadequate stakeholder engagement, or unrealistic expectations often surface, leaving teams struggling to keep the project afloat. Recognizing these problems is the first step toward turning things around. We're here to shed light on why these projects can go off track and discuss how they can be set back on course with the right strategies and support. By addressing these issues head-on, you can not only salvage the project but also learn valuable lessons to apply in the future.

SWISS COMPLIANCE & ARCHITECTURE GUIDELINES

- ☑ Full compliance with revised Swiss Data Protection Act (revDSG).
- ☑ Zero vendor lock-in on closed proprietary models.
- ☑ Seamless integration into Abacus, Bexio and M365 ecosystems.
